	1. The approved list of material testing laboratory is based on inspection reports/recommendations of field unit.				
	2. The field units must ensure, before sending material/sample for testing for which the lab is empanelled that the lab is equipped to carry out required test as per specifications.				
	3. PQC Mix Design should be got done only through labs who have facility of testing flexural strength with beam of size 15 X 15 X 70cm as per IS 516. Testing of smaller size of beam or testing of cubes for compressive strength and then arriving at flexural strength is not recommended.				
	4. Apart from the approved laboratories, services of Govt. laboratories Govt. Engg. Colleges, IITs, RECs, CRRI, National Council for Cement and Building materials etc. may be availed, wherever available.
